

# Drive awareness

## SPOT™ onboard announcements

Take your on-vehicle messaging to the next level with SPOT's onboard announcement package. Designed for 21st century transit, this powerful, next generation solution integrates with all your audio and visual equipment to provide bumper-to-bumper alerts to passengers. Complete with GPS-triggered controls, custom playlist creation, and multi-sensory engagement, this messaging solution delivers ADA compliance and an unparalleled amount of control to define and enhance your riders transit experience.

### A next-gen communications platform

- ▶ Channel next-stop announcements through speakers, signage, and displays
- ▶ Configure announcements triggers based on location, route, time of day, and more
- ▶ Manage all announcements through a web browser
- ▶ Remotely configure head signs
- ▶ Ambient noise-sensing speakers automatically adjust audio levels
- ▶ Lifetime professionally-recorded audio or text-to-speech
- ▶ Supports audio, image, and video messages
- ▶ Driver initiated ad-hoc announcements
- ▶ Supports internal and external arrival announcements

## What drives you?
