Drive your future

SPOT™ intelligent transit system

Out-of-the-box, the SPOT™ system creates a sustainable foundation for transit operations. Packed with essential tools and capabilities, our flagship ITS provides an immediate boost and sets the table for simplified expansion and customization for the future.

Plan, operate, and analyze with the core system

▸ Powerful route manager delivers intuitive, drag-and-drop route creation, GTFS management, and more

▸ Simplify reporting and analysis with powerful business intelligence options

▸ Maintain complete operational awareness with automatic vehicle tracking

▸ Collect critical transit data, including speeds, driving, counts, and more

▸ Reduce long-term cost of ownership with modern system design

▸ Inform riders with real-time tracking websites and apps

▸ Expand, upgrade, and integrate with 3rd party systems

Upgrade packages

▸ Automatic passenger counting

▸ Digital displays and kiosks

▸ Infotainment

▸ Onboard announcements

▸ Paratransit & mobility

▸ Self-serve analytics

What drives you?
